RESEARCH FOR A LIFE WITHOUT CANCER

Master Students

INTERESTED IN CANCER RESEARCH?

The DKFZ offers exciting opportunities for master students to explore the causes, mechanisms, therapy and prevention of cancer first-hand:

- Now running for over 10 years, **Major in Cancer Biology** is a hands-on 2-year study program within the **Molecular Biosciences M.Sc. Program** of Heidelberg University's Faculty of Biosciences that's dedicated entirely to cancer research
- Students may contact DKFZ scientists at any time to find out more about possibilities for **research internships, bachelor's or master's thesis projects** in their groups: www.dkfz.de/research

Learn more about the study program, application details and admission requirements of the **Major in Cancer Biology** program:
