MATERIALS SCIENCE
AND ENGINEERING

PREFACE

This brochure provides a first insight into research in Germany in the field of materials science and engineering and is especially recommended to early career researchers from abroad.

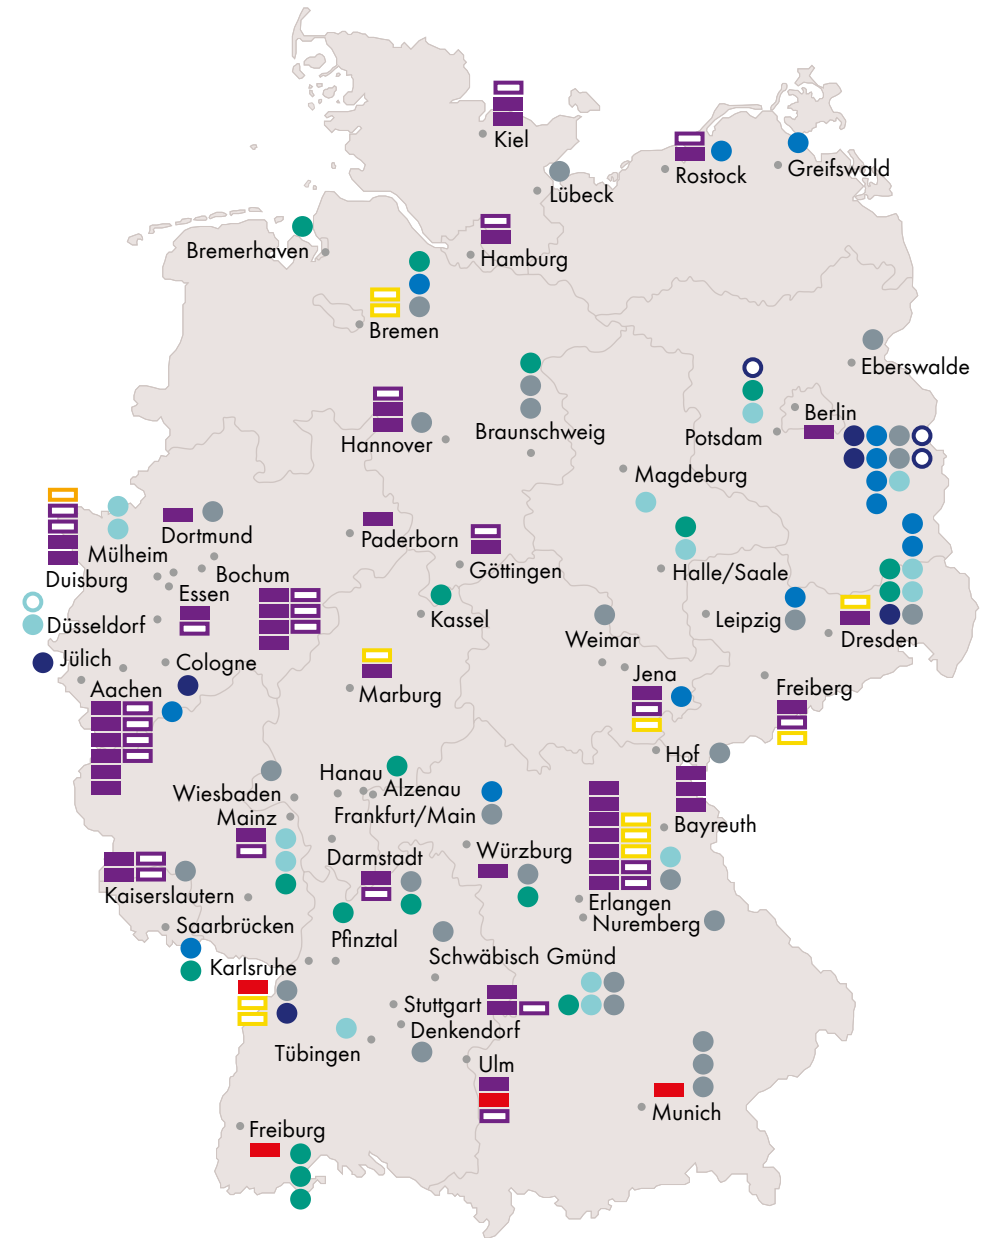

Materials science and engineering research in Germany is primarily conducted at universities but also at non-university research institutions. Almost all universities and many universities of applied sciences host a materials science and engineering research section. The spectrum ranges from small monothematic working groups to large interdisciplinary departments and covers a variety of topics from traditional areas to new explorative research fields.

This brochure is intended to give an initial overview. The following map and tables highlight research consortia and graduate training programmes at universities and non-university research institutes with a main focus on materials science and engineering.

On top of this, there is a lot more to discover: e.g. the DFG funds a multitude of individual projects in the area of materials science and engineering. These individual grants outweigh the research consortia both in number and in overall funding volume. Towards the end of this brochure, you will find a link to the online database GEPRIS that provides an overview of all DFG-funded research projects. You will also find additional important links for further information about programmes in the field of materials science and engineering and profiles of German universities and research institutions.

We invite you to explore the many opportunities that Germany has to offer and welcome your feedback.

OVERVIEW

- Research Training Groups
- International Research Training Groups
- Integrated Research Training Groups in Collaborative Research Centres/Transregios
- Clusters of Excellence
- Collaborative Research Centres/Transregios
- Helmholtz Graduate Schools
- International Max Planck Research Schools
- Fraunhofer Institutes
- Helmholtz Centres
- Leibniz Institutes
- Max Planck Institutes
- Others

DFG-funded Priority Programmes and Research Units are not shown on the map since they are not necessarily located at a single location; they are listed on pages 15 and 17.
The map shows the headquarters of the non-university research institutions.

CENTRES OF RESEARCH

- FUNDED BY DFG -

Clusters of Excellence (EXC) promote cutting-edge research. They serve to strengthen the research profiles of universities or university consortia in internationally competitive fields. They create excellent training and career opportunities for early career researchers. Within the framework of the Excellence Strategy, they can receive between €3 million and €10 million annually and are funded for seven years, starting in 2019. A second seven-year period is possible.

Collaborative Research Centres (CRC) are organisational units established at universities which enable researchers to pursue an outstanding research programme crossing the boundaries of disciplines, institutes, departments and faculties. The traditional Collaborative Research Centre is generally applied for by one university and is conducted by researchers of that university. Early career support is a key objective of the Collaborative Research Centre Programme. Early career researchers may get involved in a CRC in numerous ways, for example within the framework of an Integrated Research Training Group. Collaborative Research Centres are funded for a period of up to 12 years.

Transregios (TRR) are Collaborative Research Centres in which up to three universities collaborate with each other and submit a joint application. The contributions of the cooperative partners are essential, complementary and synergetic to the joint research objective. Funding facilitates close, nationwide collaboration among the participating universities and researchers, as well as networking and shared use of resources. There is also the option of international Transregios.

RESEARCH UNITS

-FUNDED BY DFG-

Research Units (FOR) often contribute to establishing new research directions. Research Units are made up of a team of researchers working together on a research project which is often of an interdisciplinary nature. Research Units consist of several researchers and subprojects. The subprojects of a Research Unit are often located at several locations throughout Germany. Research Units are generally funded for up to six years.

Research Units are not shown on the map. Only the titles of the thematic focus and the project websites are listed.

PRIORITY PROGRAMMES

- FUNDED BY DFG -

Priority Programmes (SPP) have a programmatic focus and the purpose of advancing knowledge in an emerging field of research through collaborative networked support. They are characterised by their enhanced quality of research through the use of new methods and forms of collaboration in emerging fields. As a rule, one programme can consist of up to 30 individual subprojects located at several institutions across Germany; it usually has one coordinating person. Priority Programmes normally receive funding for a period of up to six years.

Priority Programmes are not shown on the map. Only the titles of the overall themes and the project website are listed.

Fraunhofer Society is one of the world's leading organisations for applied research with an annual research budget of 2.9 billion euros, 76 institutes and more than 30,000 employees. Fraunhofer's R&D portfolio covers a wide range of fields, including health, security, communications, transport, energy and the environment. www.fraunhofer.de

The Helmholtz Association contributes to solving major challenges facing society, science and industry with world-level research in six areas: energy, earth and environment, health, key technologies, structure of matter and aeronautics, space and transport. With more than 40,000 employees in 19 research centres and an annual budget of approximately 5 billion euros, the Helmholtz Association is Germany's largest scientific organisation. www.helmholtz.de

The Leibniz Association is an umbrella organisation of 97 research institutes. The annual budget amounts to 2 billion euros. Some 11,500 researchers – approximately 25% of them from abroad – work on a widely diverse range of subjects, including the humanities and social sciences, economics, spatial and life sciences, mathematics, natural and engineering sciences and environmental research. www.leibniz-association.eu

The Max Planck Society for the Advancement of Science is one of Germany's largest independent non-profit research organisations. The Max Planck Society has been allocated approximately 1.92 billion euros for 2022. A combined total of 15,300 researchers, postdoctoral/junior researchers and visiting researchers at 86 Max Planck Institutes conduct basic research in the natural sciences, life sciences, social sciences and humanities. One third of the researchers and more than half of the junior and visiting researchers come from abroad. www.mpg.de

GRADUATE TRAINING

- FUNDED BY DFG -

Research Training Groups (RTG) combine an ambitious research programme at universities with comprehensive training, tailored supervision and academic freedom to form an ideal environment for a successful doctorate. Research Training Groups can also have an interdisciplinary approach. They are funded for a period of up to nine years.

International Research Training Groups (IRTG) provide opportunities for joint doctoral training programmes between German universities and universities abroad. The research and study programmes are jointly developed and supervised. Doctoral students in the programme spend six months at the partner institution.

Integrated Research Training Groups (within Collaborative Research Centres/ Transregios) offer ideal research environments for doctoral researchers. The main aim of these structured training programmes is to provide young scientists and academics with opportunities to independently carry out research at an early stage of their career. The programmes further take care to closely integrate early career researchers into an academic network. Working in Clusters of Excellence or Collaborative Research Centres projects, doctoral researchers achieve additional qualifications. As research assistants in these projects, they contribute to the Research Centre's success. They are closely involved with the projects and have access to the entire project infrastructure.

 Erlangen	Friedrich-Alexander-Universität Erlangen-Nürnberg	Integrated Research Training Group within: Design of Particulate Products (CRC 1411)	2020	www.crc1411.research.fau.eu
 Freiberg	Technische Universität Bergakademie	Integrated Research Training Group within: Multi-functional Filters for Metal Melt Filtration – A Contribution towards Zero Defect Materials (CRC 920)	2011	www.tu-freiberg.de/forschung/sfb920/sonderforschungsbereich-920
 Göttingen	Georg-August-Universität Göttingen	Integrated Research Training Group within: Atomic Scale Control of Energy Conversion (CRC 1073)	2013	www.uni-goettingen.de/irtg/438103

GRADUATE TRAINING

Location	Institution	Title	Funded Since	Contact
 Hamburg	Technische Universität Hamburg-Harburg	Integrated Research Training Group within: Tailor-Made Multi-Scale Materials Systems (CRC 986)	2012	www.tuhh.de/sfb986/projects/integrated-research-training-group
 Kaiserslautern	Technische Universität Kaiserslautern	Integrated Research Training Group within: Microscale Morphology of Component Surfaces (MICOS) (CRC 926)	2011	www.sfb926.de
 Kiel	Christian-Albrechts-Universität zu Kiel	Integrated Research Training Group within: Magnetolectric Sensors: From Composite Materials to Biomagnetic Diagnostics (CRC 1261)	2016	www.biomagnetic-sensing.de
 Rostock	Universität Rostock	Integrated Research Training Group within: Electrically Active Implants – Elaine (CRC 1270)	2017	www.elaine.uni-rostock.de/projects/service-projects/project-irtg
 Stuttgart	Universität Stuttgart	Integrated Research Training Group “Interface-Driven Multi-Field Processes in Porous Media” (IRTG-IMPM) within: Molecular Heterogeneous Catalysis in Confined Geometries (CRC 1333)	2017	www.sfb1313.uni-stuttgart.de/integrated-research-training-group
INTEGRATED RESEARCH TRAINING GROUPS IN COLLABORATIVE RESEARCH CENTRES/TRANSREGIOS				
 Aachen	Rheinisch-Westfälische Technische Hochschule Aachen	Integrated Research Training Group within: Pulsed High Power Plasmas for the Synthesis of Nanostructural Functional Layers (TRR 87)	2010	www.sfbtr87.de (DE)
Bochum	Ruhr-Universität Bochum			
 Bochum	Ruhr-Universität Bochum	Graduate School within: Mobile Material Characterization and Localization by Electromagnetic Sensing (MARIE) (TRR 196)	2016	www.trrmarie.de/graduate-school
Duisburg	Universität Duisburg-Essen			
 Bochum	Ruhr-Universität Bochum	Integrated Research Training Group within: Heterogeneous Oxidation Catalysis in the Liquid Phase – Mechanisms and Materials in Thermal, Electro-, and Photocatalysis (TRR 247)	2018	www.uni-due.de/sfbtrr247/graduate_school.php
Essen	Universität Duisburg-Essen			

GRADUATE TRAINING

Location	Institution	Title	Funded Since	Contact
 Darmstadt Duisburg	Technische Universität Darmstadt Universität Duisburg- Essen	Integrated Research Training Group within: Hysteresis Design of Magnetic Materials for Efficient Energy Conversion: HoMMage (TRR 270)	2020	www.tu-darmstadt.de/sfb270
 Hannover	Medizinische Hochschule Hannover Gottfried Wilhelm Leibniz Universität Hannover	Integrated Research Training Group within: Safety Integrated and Infection Reactive Implants (TRR 298)	2021	www.gepris.dfg.de/gepris/projekt/426335750
 Jena Ulm	Friedrich-Schiller- Universität Jena Universität Ulm	Integrated Research Training Group within: Light-Driven Molecular Catalysts in Hierarchically Structured Materials – Synthesis and Mechanistic Studies (TRR 234)	2018	www.catalight.eu/irtg-board
 Kaisers- lautern Mainz	Technische Universität Kaiserslautern Johannes Gutenberg- Universität Mainz	“Spin+X Young Researcher College” within: Spin+X: Spin in its Collective Environment (TRR 173)	2015	www.uni-kl.de/trr173

GRADUATE TRAINING

- AT NON-UNIVERSITY RESEARCH INSTITUTIONS -

Helmholtz Graduate Schools provide a roof under which a varied number of curricula in different fields, or across disciplines, can find a home. Helmholtz Graduate Schools constitute a valuable addition to the wide range of training programmes available within the Helmholtz Association. They offer optimal conditions for PhD students to work and enable them to create a network of contacts with fellow university researchers while also fostering the integration of participants into the research environment.

International Max Planck Research Schools (IMPRS) offer talented German and international junior scientists the opportunity to earn a doctorate under excellent research conditions. The research schools are established by one or several Max Planck Institutes. These IMPRS work in close cooperation with universities and other – sometimes international – research institutions. This provides an extraordinary framework for the graduate students to work in, and is a great advantage in interdisciplinary research projects, or in projects that require special equipment.
