## KEEN ON TRANSFORMING YOUR IDEAS INTO INNOVATIVE CANCER RESEARCH PROJECTS?

The German Cancer Research Center (DKFZ) in Heidelberg invites you to develop your own research ideas in Germany's largest biomedical research institute. Junior Research Group Leaders at the DKFZ profit from:

- The international community of > 100 research groups
- Excellent research conditions and access to state-of-the-art scientific facilities
- Internal and international collaborations and scientific exchange through interdisciplinary projects
- Initial funding for 5-6 years with a tenure track option
- Position equivalent to Assistant Professor level
- Career support through professional development training, family support and child care
- Administrative support through the International Staff Service, PhD and Postdoc programs

You can become a Junior Research Group Leader at the DKFZ if you are a scientist (PhD or MD degree) with more than two and less than six years of postdoctoral experience. We welcome applications from self-motivated candidates with substantial international research experience and an outstanding scientific track record. Candidates should propose highly innovative research projects and demonstrate that they can work independently and successfully acquire third-party funding.

Please contact us if you are interested in establishing your research group at the DKFZ.

Current calls and further details about the application process can be found at [www.dkfz.de/junior-research-groups](http://www.dkfz.de/junior-research-groups)
